Experience

Abelcare (startup focusing on making laboratory testing accessible and easy) — *Berlin, Germany*
Co-Founder — *June 2019 – Present*
- Set technical and product strategy for the company.
- Built infrastructure for main website and patient portal to allow users to access lab results.
- Developed integration to communicate between lab systems and internal tools.
- Ensured that the team is working on the right problems. Defined success metrics to encourage continuous delivery for faster iterations towards the business goals.

Sauce Labs (world's largest cloud-based test platform) — *Berlin, Germany*
Engineering Manager — *December 2019 – August 2021*
- Increased engineering tempo by creating a culture of continuous systems and process improvements recuding lead time by 50%
- Led cross functional team to build the manual live testing experience.
- Discuss and provide technical support to the team, offering guidance and sharing a tech vision that combines with the short and long term company needs.
- Help engineers grow by guiding them into the right challenges, offering individual learning paths and career plans.
- Coordinate and manage engineering technical recruiting.
- Align with stakeholders by setting the right expectations and create a transparent communication between all parties.

data4life (platform to empower the research community on medical findings) — *Berlin, Germany*
Product / Engineering — *November 2018 – November 2019*
- Led team of iOS and Android engineers to build native apps and an SDK to enable d4l integration in other systems.
- Defined decision making proposal flow for developing new features and applied story mapping resources to provide a simple and easy to adapt framework.
- Led engineering recruiting process.

Pager (healthcare startup with a $100mm+ pre-money valuation) — *New York, USA*
Engineering Manager — *October 2013 – November 2018*
- Joined as the first employee and worked with the founders to design and implement state-of-the-art infrastructure.
- Led team of 10 engineers (5 remote) for all iOS, Android and Web projects, including the creation of an SDK that integrates Pager core features into other apps which resulted in the expansion of services to New Jersey.
- Created business logic & architecture for a telemedicine workflow (doctor/patient) for the mobile apps.
- Designed architecure for a Web platform that connects nurses with patients powered by AI and ML.
- Hired and supervised engineers, growing the team from 2 to 25 in a hybrid setup with mainly remote members.
- Defined and implemented a data-driven approach which resulted in a 120% increase of registrations and chat sessions.

Vooki (last-minute booking app) — *Buenos Aires, Argentina*
iOS Developer — *October 2012 – October 2013*
- Led 3 people cross-functional team and implemented the iOS app.

TinyCo (Tiny Zoo Friends, a social mobile game with microtransactions) — *Buenos Aires, Argentina*
iOS Developer — *December 2011 – September 2012*
- Contributed to build several product updates increasing revenue by 10%.

Education

Universidad de Buenos Aires — *Buenos Aires, Argentina*
BS in Computer Science and Engineering — *2005 – 2015*

Skills

Languages: Spanish (Native), English (Fluent), German (B1), Italian (B1)
Industry Knowledge: Engineering Management, Product Management, Mobile UX, Software Architecture, B2B, SaaS
Technologies: Objective-C | Swift, JS, React, .NET, MySQL | MSSQL | GraphQL | MongoDB, NodeJS, Python
Cloud Computing: AWS, Azure, GCP
